To our Country Patrons. Please to register your letters cont inces, as we hold ourselves responsible

Many who voted with the Radicals in this State flatter themselves that they only voted for a Constitutional amendonduct. They identified themselves in that vote with the Republican party. They nade themselves accessory after the fact gress, and startling usurpations of power the Executive. They will observe that they are applauded by every Radical sheet in the Union as in the ranks of the and fortify the party in power, and sanctify all its acts. They justify the employment of negro soldiers, the continuance of martial law in this State, the interference of the military in our elections, and the supremacy of the military over the civil power. Instead of a protest, their vote is an indorsement of all these things. It is so held everywhere. They are now in party harness, and step by step they will indorse all that party will -negro suffrage, and negro equality before the law included. This same party in Kentucky are a part of the dominant party in the United States, and its action s justly considered as an indorsement of all the dominant party may have done, and a pledge of support to all it may hereafter do. The Executive recognizes their standing by giving them immediately one instalment of the spoils in the way of offices. They followed the flag with Constitutional amendment written on it, and plausible excuses for such a vote; but on that flag was written the whole Radical creed, and the vote given was pledge of party affiliation. Those who so voted will generally redeem the pledge. Party toils will keep them in line. They will be as skillful in finding excuses for what is to come as they were for their votes for this amendment, that they would not have touched a few years ago, Some which is highly amusing. All their influence at the polls was cast for this very Radicalism. It is counted, by the Radicals and for them; and they are not mistaken, When Chase or one of his school is put forward as a candidate for President, they will be in harness, ready to do battle for him: and although they may affect to find fault with some things, as their organ does, both they and the organ will see sights and hear sounds; and tell us about the logic of events. Harlan, jr., for the House of Representatives, in Franklin county. It seems that the Radicals had set their heart upon carrying the capital of the State, and to that end concentrated their efforts there, giving up every other county in that (the Ashland) district. Distinguished speakers from various sections of the State were imported there; the local talent drawn heavily upon, and every possible influence brought to bear. Their andidate was a man of much personal eleverness and great popularity. Learnng all these things pending the canvass ve confess that we were not without apprehensions as to the result. We knew the ability of Mr. Harlan, and that he could successfully debate the questions with any of them, but we knew, likewise, that he had not the ability to be at two or more places and make speeches at the

same time, which would have been required to meet all the appointments they But the result has demonstrated that our fears were groundless, and that Mr. Harlan was an overmatch for them all. We congratulate him on the result, which proved to be, not simply a success,

but a triumphant election.

where an arbitrary rule to apply to all places, whether applicable or not, such things always will be. Under the old order of things, the States regulated matters to suit the circumstances. What was suitable in one place might be injurious in another, and under the flexible form of government by States, the law could be adapted to the immediate requirements of inflexible rule is adopted that fits nowhere and which it is out of the power of the people interested to modify or change What is necessary has to be referred to those at Washington, who are jealous o any interference or criticism of a policy formally adopted, and who, not being directly interested, fail to appreciate the necessities. If, after a period, they should at length learn the error of their present policy, it is to be feared that the evil will be done past recall. Take, for example, the matter of negro soldiers in the Southern States. All of them which have or ganized a Provisional Government have requested their withdrawal. The reason for it is plain to see, though it may not be to the authorities at Washington. It disorganizes, and we may say destroys, the labor in the Southern States. Now the President will not take the responsibility of acting upon this until he has felt the pulse of Congress. That body, a majority of whom are selected from violent parthe people there, will not pay much heed to requests which run counter to their diers are removed from that quarter, they the States where they reside. Thus years will flow away, the evil continue increasing and becoming more aggravated, until

some; there are thousands of details, for

wing daily more degraded and cum equence of the present condition of affairs is shown in the Southern States now. The dispatches tell us that the blacks will not labor for their old masters: that the planters, having no confidence in them, will not employ them, and that as out at tremendous sacrifice, preparatory to emigration. This coincides with what we heard the other day from a gentleman recently from the South. By his account. plorable. In the interior labor is wholly disorganized, and lands which before the war sold at sixty or eighty dollars in gold per acre, can now be bought for a dollar and a half and two dollars; that all who can are emigrating; those with more eans to Brazil; the others towards Ken-

except by degraded troops of idle negroes,

tucky and Tennessee.

This is the direct consequence of the re ould not be in they are uncommitted; the leaders know even emancipation as a condition, provided it had been left with them to control the labor; to compel the blacks to contract to labor for a season, and when they contracted, compel them to fulfill the contract; to leave the matter to be settled by the people interested, and not to some distant and alien power, wholly unfamiliar with their wants and necessities, and uninterested in their prosperity. The rejection of the Sherman-Johnston treaty pract

tically deprived the whites of their own affairs, and gave it to their servants.

The blindness of fanaticism is shown in the fact that they cannot see that the course which they adopt as a merited punishment to the South reacts with equal force upon the loyal States. We have before discussed the dangerous policy it in augurated of clothing the central Government with power dangerous alike to the freedom and prosperity of all the States, and we need only allude to it now. There is another view of the subject, however,

We have upon us a tremendous Nation al debt. The rejection of the Sherman-Johnston treaty, by which the duty and expense of regulating Southern affairs devolved upon the Southern people, involves the necessity of a large standing army and numerous highly-paid officials, increasing the already heavy burden we have to bear. This, however, is a mino onsideration compared with what is shown by the deplorable condition of atfairs in the South. When men will not labor, or capital will not employ laborers; when land falls from eighty dollars an acre to a dollar and a half, it is the rankest absurdity to suppose that those people will be of any assistance in aiding to pay off the public debt. The capital cessary to meet the debt is going away. There are no productions to bring capital upon the questions which will be before into the South to aid. We have not only the body; his firmness and fearlessness in to pay our liabilities, but to support those who remain-all traceable to that fatal blunder of rejecting the Sherman-John-

ston treaty.

Another error is in supposing that the form of government containing a number of States under a head instituted to egulate certain limited affairs, is entirely matter created by a paper constitution The growth of States, as such, is the work of nature. Certain persons living in a locality agree from the force of cir cumstances to form one government for They grew up as a State, naturally as the child grows to the man. The States existed as States antecedent to any Federal Constitution, and independent of it. to all persons interested in the commercial prosperity of Kentucky to with untiring energy of some of our leading spirits in their efforts to fully develop the petroleum interests of Kentucky. Among the most active companies organized in this State is the Beaty Oil Well Company, which organized on the 20th of July, with a capital of \$2,000,000, and which has upwards of 70,000 acres of land, of which a great portion are owned in fee simple, and the balance held on most favorable eases. These lands lay in Pulaski, Wayne and Whitley counties, and on one tract, on Big South Fork, is situated the fanous Beaty well, from which oil has flowed for 41 years. This well, which was bored in 1825, for salt, by Conn Beaty & Fulton, of Abingdon, Va., filled with oil at the depth of 110 feet to such an extent that it so interfered with the work and machinery that these gentlemen abandoned it, and sunk one some two miles below, which well proved a complete success, as superior salt water was found at 290 feet. Some years after this oil well had been abandoned, Marcus Huling concluded to try his fortune, and, procuring barrels, gathered a boat load of the oil from the well and shipped it down the river. By some mismanagement Huling lost his cargo some few from the well which misfortune so chilltisans, who regard all evils to the ed the ardor of the enterprising oil pieneer South as a providential punishment to that from this time he ceased work. The pulp, when prepared, can be transconfident of their success. The great benefit to Louisville of producing oil wells throughout the State will be soon felt, as already the products of the Germania and Boyd's Creek Companies are being refined and sold in this market, and will bring large amounts of capital westward, which will tend to further the developments of the untold mineral wealth of our native

Messrs. Editors: Allow me through your columns to say a few things that are very important, not only for the good of our neigh borhood, but the city at large. The citizens of the terior of the city are in the habit of hauling all their trash to the suburbs and within the city limits, leaving it there to annoy the whole commuty. Such as dead horses, cows, hogs, dogs, rotten eggs and apples, scraps of old frient, &c., they take as far as Kentucky street and throw them into the ponds, creating such a stench as to render it almost intolerable. We of the suburbs might with as much farket street and empty it. Why cannot there be place selected out of the city limits to deposit the dirt and filth? Hotel and restaurant keepers, afte they have a sufficient quantity of the above-name stuff on hand, pay so much to have it hauled awayhey care not where so they get it away. Sor

CONNUBIAL FELICITY AND BLISS-HOW WIVES SHOULD BE TREATED.-Nothing s more susceptible of harm "from the torms of this rude world" than the deliate nature of woman. The husband remains hearty and robust in seasons when the frail and delicate wife droops like a rudely handled sensitive plant. " The storm that leaves the oak unscathed uproots the flower." If your wife is ailing. if sickness prostrates her, if maternal solicitude and care wear upon her, remember, you are the Heaven-appointed guardian of her health. You should not fail to supply her with delicacies which will assist nature in restoring her to full vigor. PLANTATION BITTERS are just the thing she needs. Their effect in building up the system, restoring the life forces to their original vigor, creating new blood and adipose matter, is truly magical. aug25 f,m,w&w

NEW YORK, August 29. The Tribune's Brownsville (Texas) correspondent of Aug. 5th says: This evening Senor Robles, Mexican Minister of Public Works, came over the river on a visit, and was received by Gen. Steele, who gave his distinguished visitor a quiet dinner at Miller's hotel. Among the guests were Gens. Weitzel and Draper. After a pleasant repast, at which friendly sentiments were exchanged, the party broke up, Senor Robles recrossing the river. Senor Romero and Gen. Ortega are said to be on their way here, and are looked for daily. The visit of these two distinguished Liberals seems to point to something

perals seems to point to something out to be done on the Rio Grande, All about to be done on the Rio Grande. All quiet along the river at present.

The Herald's Vera Cruz correspondent of the 13th says: On the 26th of last month the town of Zongolico declared itself in favor of the Republic. It is the chief town of one of the most populous districts of Vera Cruz. This district lies adjacent to Orizaba, and extends to the foot of the Sierra Madre, which slopes to the coast south of this place, the whole section, as far as I observed, being devoted to the Republican cause, and commanded by General Garcia. Five hundred men, armed. al Garcia. Five hundred men, armed

General Garcia. Five hundred men, annea, with good rifles, are maintaining the findependence of Zougolico, which is too difficult of access to be easily conquered. A force of two hundred Austrians, who recently marched from Orizaba with the intention of whipping the insurrection-ists, fell into an ambush on the road, and were forced to take to flight, leaving thirty dead on the field. A few days since the Austrians met with

nother reverse north of Puebla, in which, coording to City of Mexico papers, one ompany of infantry and fifty dragoons all victims to the ferocity of the Repubcountry shows that in addition to the executions decreed by court-martial, encounters are constantly and almost daily taking place between the Imperialists and Republicans, in which the losses in killed in one range from twenty to fifty and one dred or more on each side. Herald's Washington special says

folionel Samuel Thomas, Assistant Com-nissioner of Freedmen in Mississippi, re-orts from Vicksburg, under date of Au-ust 15th, that out of 346,600 freedmen in State only 3,000 are subsisted by the vernment. Five thousand freedmen fovernment. Five thousand freedmen re earning a good living by cutting wood in the forests. The colored colonies and armers are reported to be doing finely, and s harvest time approaches the help which has been afforded them by the Govern-

ment is being gradually withdrawn.

About ten thousand bales of cotion will be produced by those of the negroes that have undertaken the culture of that staple in the interior of the State. The major part of the freedmen who have con-tracted their labor, are working well and are getting better ideas of their condition. The more intelligent and honest Missis-sippians are represented as being willing to assist in developing the new order of things by the employment of ways and means, but they can't be made to see the feasibility of projects calculated to secure the independence and security of the

WASHINGTON, Aug. 29. We learn authoritatively that the Government's financial condition is easy, and that the Secretary of the Treasury will be able to meet all demands with the means ble to meet all demands with the means able to meet all demands with the means he has at his command. No statement of the public debt will be made on the 1st of September, nor will there be a statement hereafter oftener than once in two months, so the next statement of the public debt will appear on the 1st of October ensuing. Investigations, just closed, show that barpers have swindled soldiers terribly in discounting their claims. One of them alone must have made \$40,000.
